Motivation

I'm a freshly graduated UX Designer. During my studies I created big project in a proces from reserch, through very interactive prototype, to user testing. Currently I work freelance for Cywinski.pro and CabinCrew.pro. I am very eager to work on commercial projects full time.
Thanks to SWPS postgraduate studies in User Experience / Product Design I feel well prepared to work as a UX. I am constantly expanding my skills in this field.

I am sure that working in UX/UI is my future. Working as a nurse prepared me well to work in a team, developed my interpersonal skills, taught accuracy and resistance to work under pressure.

Experience

2021-06 - current **UX/UI Designer**
Cywinski.pro & CabinCrew.pro
Developing desings of current brands and working on upcoming.
- Developing UI mockups
- Designing graphics and design systems in Figma
